

PROJECTS SUMMARY

“The Center’s simple tools got us moving: we’d been trying to do too much. Our first Projects Summary showed we’d overcommitted ourselves. Our new 1-page Goal Tree clarified priorities and unlocked energy to focus on the big picture.” - Bob Wahlin, President, Stoughton Trailers

The Big Project Picture

It’s easy to over-commit the management team unless you can see in one place what they’re working on and the time and money involved. The **Projects Summary** snaps the top issues into focus: status, priority, leadership and of course cost. Used with the Project Planner, it helps people address issues *before* the review meetings.

Benefits

The Center’s tools minimize omissions, improve communications and foster collaboration. The **Projects Summary**:

- Be able to report to the executives and Board easy and confidently
- Creates regular opportunities to recognize project teams for their contributions
- Keeps from long discussions of projects that are on track

Difficulty Challenging
Estimated time 24-40 hours

Instructions

Start by entering all substantial projects already underway. Then add projects needed to fulfill the overall plan (see the Goal Tree). Use the Project Planner for any complex project.

1. Start by listing all the projects and entering initial ideas about priority
2. Link to the most relevant strategic goals (see Goal Tree)
3. Fill in the Gantt Chart (timeline) last—then revise the sequence as needed
4. During review meetings, establish strict time limits for discussion
5. Focus first on projects with problems (red) and then those at risk (yellow)

Subscribers can contact the Center for assistance: info@theindex.net

Make It Better

Users should share ideas for improving any of the Center’s tools and how they’re taught and formatted. It’s also great to suggest new applications or brand-new tools.
